

# Entry Level Stewardship apply or renew online

You can now make ELS applications with Natural England using our online software. We have a friendly, dedicated online helpdesk team who can get you started and guide you through the process.

- Make multiple applications (useful if you are an agent or farm advisor), review, amend and save as you go
- Quicker and easier application process, saving up to 5 days getting applications in and saving money on postage
- Your points are calculated as you add features and options
- The software has its own measuring tool. Save days measuring hedgerows, buffer strips and other boundary features by using your computer instead
- The package is quick and easy to download, with user friendly prompts and guides to avoid mistakes
- Hyperlinks to handbooks and useful information are included for your reference
- The online team will support you and your application from start to finish

*"Just done my online application – very impressed with the maps"*

*"It meant that I could start on an application immediately, I didn't have to wait for the maps to be sent."*

*"good programme – well worth using"*

*"this is a very useful system, you can make changes, add fields, delete fields and try out options easily"*

Find out more about applying or renewing online
